Find Your Perfect Profile

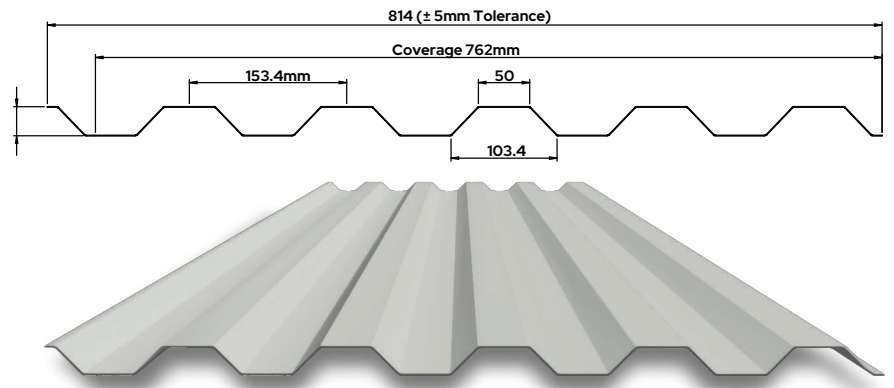

Best Mate™ Fencing

CMI's Best Mate™ range is the perfect solution for all residential fencing. Strong, durable and easy to assemble, it is both pleasing to the eye and tough enough to stand the test of time. Installation is easy thanks to its simple design and it can be custom fabricated to meet your exact specifications. Identical profiles on both sides of the fence means you and your neighbours can stay Best Mates!

Thanks to CMI's meticulous fabrication process, Best Mate™ Fencing looks flawless from every angle. Modern and stylish, with a full palette of COLORBOND® Fencing colours to choose from, it offers the flexibility to complement any home design – making it the ultimate choice for shared fencing.

Product Features:

- Manufactured from high-quality steel
- Designed for harsh Australian weather
- Wavelock design
- Fast, straightforward installation
- Easy to clean and maintain
- Full 10-year warranty
- AS/NZS 1170:2:2002 wind-rated
- Full COLORBOND® Fencing colour range available

WHAT IS SHARED FENCING?

'Shared fences' are fences that act as a separator between different lots. These dividing fences are often known as 'shared fences' between neighbours because they're often used to outline the boundary between residential land. Most people have at least one or two shared fences around their home, depending on the position of their block. It's usually considered best practice for the cost and maintenance of shared fences to be shared equally between adjoining neighbours, unless someone has negligently caused damage. Shared fences are a common cause for dispute between neighbours. Many fencing products only look aesthetically pleasing from one side, so it's not uncommon for a neighbour to install a shared fence that only looks appealing on their side, or for neighbours to dispute costs. This is where products like Best Mate™ Fencing can help!

WHY CHOOSE BEST MATE™ FENCING?

At CMI, we have invested in a new dual level roll-former. It's the easiest solution for keeping neighbours on both sides of the fence happy, with a uniform look that delivers the same style and strength on either side.

This advancement allows us to manufacture Best Mate™ Fencing with greater precision and consistency, giving you a high-quality finish every time.

HOW TO CHOOSE THE COLOURS OF YOUR NEW COLORBOND® FENCE

Whether it's inspired by your home's colour palette, or that of your neighbour's, or the natural environment around you, your fence deserves to be a well-considered decision. When building a new fence or replacing an old one, COLORBOND® steel's wide range of naturally inspired colour choices give you the flexibility to beautifully complement the houses on either side of it. You can harmonise or contrast your COLORBOND® steel fence colour with your existing roof or walls, or even use it as a dramatic backdrop in your landscaping.

A COLORBOND® steel fence is remarkably strong, durable, easy to maintain, and enhances the looks, security and privacy of any property for many years to come.

Comline Fencing

Comline Fencing is a reliable fencing solution from Combined Metal Industries, designed to handle Australia's harsh climate with confidence. Made from genuine COLORBOND® steel and manufactured locally using advanced techniques, Comline Fencing combines long-lasting strength with clean, modern style.

Whether it's for privacy, protection or street appeal, Comline Fencing is tough, low maintenance, and built to perform year after year.

Product Features:

- Made from quality Australian COLORBOND® steel
- Resistant to termites, rot, and corrosion
- Fire-resistant – suitable for bushfire prone areas
- Wind-rated to AS/NZS 1170:2:2002
- Compliant with Australian quality and safety standards
- Low maintenance and long-lasting durability

ATTRACTIVE STYLE AND FLEXIBLE DESIGN

Create the fencing look that matches the landscape it surrounds. With Comline Fencing you can mix and match colours for your fence panels, rails, posts and gates from an extensive range of Fencing colours in COLORBOND® Steel. For further style and privacy, Comline Lattice Plus will give you an additional lattice top to your fence that increases the fence's design appeal whilst further reducing visibility from the outside. Comline Fencing also provides an array of accessories for further customisation and its flexible design means it can be integrated with other landscape features (eg it can be installed on top of limestone walls).

STRENGTH AND SECURITY

Comline Fencing provides the very best in strong and secure fencing. Manufactured by Combined Metal Industries, Comline Fencing combines the highest quality Australian COLORBOND® Steel with advanced manufacturing techniques that comply to relevant Australian Standards. The end result is a fence you can rely on to be highly durable, rot and termite resistant, fire proof, corrosion resistant and wind rated to Australian Standards AS/NZS 1170:2:2002. Security is also improved, as the close fitting panels and smooth surface on both sides mean there are no gaps to see through or footholds to gain access from.

WA FOCUSED SERVICE AND SUPPORT

Comline Fencing is made in WA by Combined Metal Industries (CMI), the largest WA owned manufacturer of residential steel roofing products. CMI is one of Bluscope Steel's major clients. Being a local company, you can rely on CMI's personalised and timely service, as WA is our primary market and our total focus.

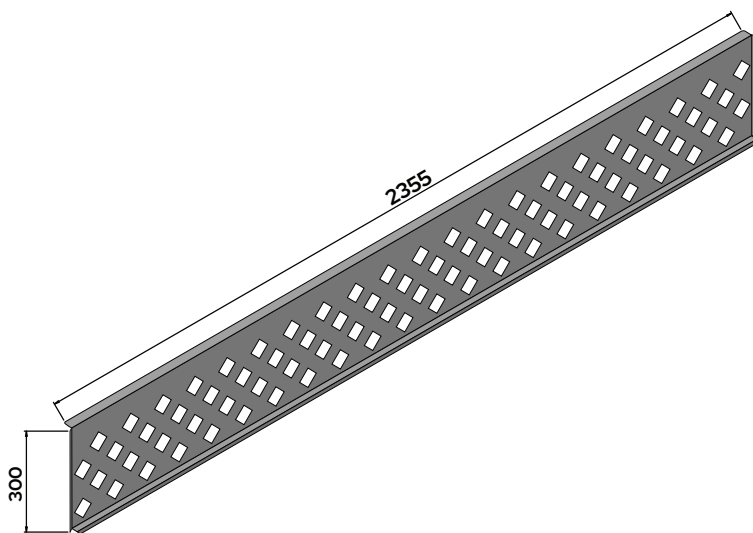

Fencing Accessories

COMWALL PLINTH COLORBOND® Steel Accessory

Combined Metal Industries bring you the Comwall Plinth, part of our fencing range. Designed for when there's a variation in height between neighbouring properties, the Comwall Plinth is a cost-effective alternative to traditional retaining walls.

Available in a wide range of COLORBOND® Fencing colours, it's a fully engineered retaining solution that saves time, money and space – all while looking great alongside your fence.

LATTICE COLORBOND® Steel Fencing & Accessories

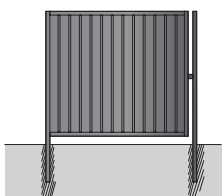

Add a decorative touch to your fencing with Combined Metal Industries' steel lattice. Custom-made in a wide range of COLORBOND® Fencing colours, to suit our fencing range and gates.

They let more light in while maintaining privacy and are built tough with the durability of COLORBOND® steel. Low-maintenance, versatile and stylish – the perfect finishing touch.

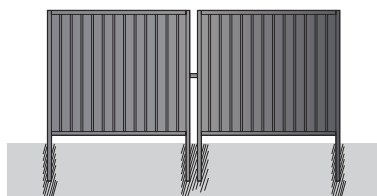

METAL GATE FABRICATORS – COLORBOND® Steel Gates & Accessories

Combined Metal Industries manufacture durable, custom-made COLORBOND® steel gates to suit your fencing project. Each gate comes complete with frames, fixing rails, posts, latches and striker for a seamless fit and easy installation.

Resistant to rust, corrosion, warping and pests, our gates are built for Australian conditions and require minimal maintenance. Available in a wide range of colours, they're strong, modern and made to last.
